REPORT OF COUNCIL

To the Members, at the Annual General Meeting, Wednesday, February 23rd, 1887.

I. SESSION 1885–86.

PUPILS AND FEES.

The entire number of Pupils during this Session was 1835, being a decrease of 79 on that of the preceding Session. Of these 1192 were Students in the College, and 643 Pupils in the School. Of the Students, 383 belonged to the Faculty of Medicine, 80 being new Students: in the Faculties of Arts and Laws and of Science there were 809 Students, 431 being new Students. The largest number of Boys in the School in any one Term was 550.

As compared with the preceding Session these figures show a decrease of 22 Students in the Faculty of Medicine, and a decrease of 19 in the new Students. In the Faculties of Arts and Laws and of Science there was a decrease of 32 Students, and a decrease of 74 in the new Students. There was a decrease of 25 in the number of Pupils in the School.

The Fees received (exclusive of those for Clinical Instruction) amounted to £31,367 14*s.*, being £702 9*s.* less than in the Session 1884–85.

The details for the two Sessions compared were as follows:—

	1885–86.			1884–85.		
	£	*s.*	*d.*	£	*s.*	*d.*
Faculty of Medicine	5,867	18	6	6,681	3	0
Faculties of Arts and Laws and of Science.....	12,412	11	6	12,058	4	0
School	13,087	4	0	13,330	16	0
	£31,367	14	0	£32,070	3	0

The total payments to Professors, Teachers, and Masters amounted to £21,384 17*s.* 0*d.* In addition to the above-stated amounts, the sum of £1883 14*s.* 0*d.* was received for Clinical Instruction in the Hospital, making a total of £7,751 12*s.*6*d.* paid by Students of the Faculty of Medicine in the Session.

SCHOOL.

The returns which have been laid before the Council show that the discipline of the School remains in a satisfactory state.

The Juliana de Rothschild Prize of £20 for the candidate from the School who should obtain the highest place in the Honours Division at the June Examination for Matriculation in the University of London, was given originally by Mrs. Isaac Cohen in memory of her daughter, the late Baroness Mayer de Rothschild. Since Mrs. Cohen's death her daughter, Miss Lucy Cohen, has offered to continue giving the Prize from year to year. It was awarded last year to G. T. Bennett, who gained the fifth place in the Honours Division.

At the June Matriculation Examination in the University of London in 1886, seven places in the Honours Division were gained by pupils of the School, the West Scholarship in English being awarded to one of the seven, B. L. Abrahams.

The following Table shows the number of boys in the School in each of the three Terms of the last five Sessions:—

	1st Term.	2nd Term.	3rd Term.	Average for the year.
1881–82.....	600	599	587	595
1882–83.....	568	582	610	587
1883–84.....	582	576	566	575
1884–85.....	561	556	555	557
1885–86.....	546	550	541	546

In the first Term of the present Session the number was 507.

From the Tables submitted it appears that out of a total of 643 boys, 27 were entered in the Black Book last Session, the total number of entries being 43.

Four Scholarships, defraying half the cost of admission to the School for three years, will in July be offered for competition among boys between the ages of twelve and fourteen, whether already in the School or not.

II. GENERAL FINANCES.

The excess of expenditure over receipts for the Session 1885–86 was £539 18*s.* 5*d.*

There was at the end of the Financial year a debt of £8,000 17*s.* 6*d.* on the extension of the North Wing, being a reduction of £931 4*s.* 8*d.* on the debt of last year.

III. THE CURRENT SESSION.

The entries of Students to February 1st, 1887, have been as follows:—in the Faculty of Medicine, 287, of whom 71 are new Students; in the Faculties of Arts and Laws and of Science, 577, of whom 292 are new Students: in the School, in Michaelmas Term, 507, of whom 82 were new pupils; in the present Term, 508, 48 being new pupils.

The College Fees received to February 1st are £4,636 5*s.* 6*d.* in the Faculty of Medicine, and £8,452 10*s.* in the Faculties of Arts and Laws and of Science.

DEATHS OF MEMBERS OF COUNCIL.

The Council has the painful task of reporting the deaths of no less than three of its Members since the last General Meeting.

At its session on the 3rd of April, the death of Dr. Storrar was announced, Dr. Storrar was one of the earliest students in the Medical Faculty of the College, and since his election on the Council devoted great attention to the means of improving the Medical School.

It was not only in that respect, however, that his services are especially to be regretted; his general experience in all matters connected with education were of the greatest value, and the way in which he imparted it was always most instructive.

He was elected in 1870, and since 1871 had been an active member of the Committee of Management.

On the 8th of May the death of one of the youngest Members of Council was reported.

Dr. Stock succumbed after a short illness. He was a Fellow of the College, and it was anticipated that his comparatively recent experience as a student of distinction, and his connexion with one of the large educational establishments in the neighbourhood of London, Mill Hill School, might be of considerable benefit.

Lastly, on the 15th of January of this year the announcement of Mr. Arthur Grote's death was received.

Mr. Grote was elected on the Council in 1872, the year after the College had sustained the great loss of his brother, the late President, Mr. George Grote. He was a very assiduous attendant at the Council, was a member of the Hospital Committee, and took a special interest in the Slade Department, in connexion with which his advice will be greatly missed.

* The names under this heading are in alphabetical order.

DEATHS OF OTHER MEMBERS OF THE COLLEGE.

Mr. S. H. Bickham.
Colonel T. E. Bigge.
Mr. H. W. Busk.
Mr. G. Busk.
The Right Hon. Lord Cardwell.
Mr. J. S. W. S. E. Drax.

PROFESSORSHIPS.

Professor Alexander W. Williamson has given notice of his resignation of the Chairs of Chemistry and of Practical Chemistry, which he will vacate at the end of the present session.

Professor Williamson's resignation after invaluable services to the College and to Science since 1849, is a matter of profound regret. Having, in 1849, been appointed to the Chair of Practical Chemistry, he succeeded Professor Thomas Graham in the Chair of Theoretical Chemistry in the year 1855, and as a co-worker with Laurent and Gerhardt in founding Modern Chemistry, Professor Williamson not only obtained the highest distinction for himself throughout Europe, but necessarily conferred honour and distinction on the Chemical department of University College. To distinguished capacity as an original investigator of the highest order, Professor Williamson added a singular power of philosophical exposition, by which all students benefitted, and owing to which a very large number have risen to eminence in Science.

After so many years of keen interest in the College, and the honour conferred upon it by Professor Williamson's European reputation, it is well to give this more than formal expression of regret for his retirement, and gratitude for the benefits conferred on the College during so many years.

PROPOSED AMENDMENT OF BYE-LAWS.

It is considered desirable to appoint a paid Auditor, and with a view to this the Council propose that the Bye-Laws concerning Auditors should be amended as follows :—

II. 4. There shall be three Auditors, of whom one shall be a professional and paid Accountant.

II. 5. The Annual General Meeting in every year shall choose one and, if necessary, two unpaid Auditors. In every year in which, fourteen days before the Annual General Meeting, there shall be two unpaid Auditors, they shall appoint one of their number to vacate, and if they fail to do so, the Council shall name the unpaid Auditor to vacate, and the person so named shall vacate at the time appointed, unless the number of unpaid Auditors be then less than two.

The unpaid Auditor so vacating shall not be re-eligible for the then ensuing year.

The paid Auditor shall be chosen at the Annual General Meeting for one year, and may be re-elected from time to time.

V. 2. Two Auditors, of whom the professional Auditor must be one, shall be a quorum.

BUILDING DEBT.

Although the debt is being gradually decreased by the annual application of about £850 from the income of the Goldsmid Fund, the Council desire to remind the Members of the College that a sum of £8,000 is still owing in respect of the North Wing, and that there is consequently a heavy annual charge for interest and repayment of that debt. The Council have to thank Miss Sharpe for a further contribution of £50 towards the reduction of the debt.

ENGINEERING DEPARTMENT.

The additional apparatus referred to in the last Annual Report is now in full working order, and has added much to the usefulness of the Laboratory. Since last year there have been further additions to the Laboratory appliances, including especially two different Automatic Test-recording Machines. The arrangements of the Laboratory and the methods of work adopted in it have formed the subject of a paper read at the Institution of Civil Engineers by Prof. Kennedy, which was followed by a discussion lasting over three evenings.

PHYSIOLOGICAL DEPARTMENT.

During the year several changes tending to facilitate the work of the practical classes and the arrangements for carrying on research have been effected. Amongst these may be specially mentioned the fitting up of motors and shafting in two of the rooms, for the better conducting of experiments requiring recording apparatus. These improvements have been rendered possible by the existence of the Apparatus Fund, which has received some accession during the year, and notably a second liberal donation from Dr. C. D. Phillips.

A considerable amount of original work has been carried on in the Laboratory and has been in part communicated to the Royal and Physiological Societies, or published in the scientific journals.

MEDICAL DEPARTMENT.

The Anatomical Theatre has been the seat of extensive alterations. Additional skylights have been constructed in the roof, the seating has been rearranged, and beneath the seats three spacious and well-lighted rooms have been made and fitted up for the use of the Professors lecturing in the theatre.

In the Practical Anatomy Department hot-water apparatus has been erected for warming the large Dissecting Room, and a new system of gas-lighting has been provided.

These valuable improvements and additions are highly appreciated by the Professors and Students.

PHYSICAL DEPARTMENT.

In June 1886, a former student of the College, Mr. J. Rose-Innes, B.Sc., now of King's College, Cambridge, made known, through the Professor of Physics, his wish to do something for the promotion of the study of Physics in the College, and his intention, in pursuance of the object, of giving the interest, amounting to about £60 a year, of a certain sum at his disposal, to form a fund to be under the control of

the Professor of Physics in the College, for the time being, for the purchase of apparatus required either for the purposes of especial research or of instruction in Physics. In accordance with this intention, Mr. Rose-Innes made a first half-yearly payment of £30 last July.

The College is further indebted to Mr. Rose-Innes for a powerful induction-coil which he has presented to the Physical Laboratory.

SLADE TRAVELLING SCHOLARSHIP.

Professor Legros has generously promised to contribute £100 annually during the tenure of his Professorship towards a Travelling Scholarship to be offered to the Students in the Slade School. The Council propose to add £50 from the Slade Prize Fund, so that the Scholarship will be of the value of £150.

The first competition for this Scholarship will be held at the end of May in the present year, and the regulations may be obtained on application to the Secretary.

BARLOW LECTURES.

The Barlow Lecturer, the Rev. E. Moore, D.D., Principal of St. Edmund Hall, Oxford, will resume his lectures on Dante's "Divina Commedia" after Easter. The lectures are open to the public without payment or tickets.

MORRIS BEQUEST.

The Council are indebted to the late Professor John Morris for a bequest of £100, the interest of which is to be annually bestowed by the Professor of Geology, and called the "Morris Prize.'

YATES BEQUEST.

It has been already stated, in a former Report, that, owing to the death of Mrs. Yates, the valuable legacies bequeathed by the late Mr. James Yates for the endowment of the Chairs of Geology and Archæology have reverted to the College.

The fund for the endowment of the Chair of Geology now consists of £4,217, London and North Western Railway Stock, that for the endowment of the Chair of Archæology of £6,293, North London Railway Stock, and the title of Yates Professor of Geology has been conferred by the Council on Professor T. G. Bonney, F.R.S., and that of Yates Professor of Archæology on Professor Newton, C.B.

INDIAN SCHOOL.

The Indian School has declined in numbers although it has steadily maintained its character. Of the thirty-eight selected candidates for the Indian Civil Service who went up to the last Final Examination, only seven, or between a fifth and a sixth part, came from University College, but these obtained one third, and in money value more than a third (£170 out of £445) of the prizes awarded. They took the prize in Law and four prizes in native Languages, Burmese, Marathi,

Hindi and Hindustani, one student was also within the marks of the Prize in Sanskrit. But in face of the strong competition of the older Universities, and recent energetic action of the University of Cambridge for the promotion of its Indian School, aided by a special grant from the University chest, it will be difficult to maintain our Indian School unless special means be taken to make its advantages more widely known.

PROPOSED ATHLETIC GROUND.

Early in the session a deputation of Professors and Students waited upon the Council urging the necessity of obtaining a ground for cricket and other sports. The Council is fully alive to the advisability of having a permanent recreation ground, both for the College and the School, and made an unsuccessful attempt to treat with the Metropolitan Railway Company for some land near Willesden. Their terms, however, were not acceptable, and it is much to be feared that the means at the disposal of the College will not suffice for the attainment of the desired end unless some external help is provided.

SECRETARYSHIP OF THE COLLEGE.

At their meeting on 5th of June, the Council, having been informed by Mr. Talfourd Ely that he intended to resign the office of Secretary to the College, passed the following resolution:—

> "Resolved unanimously that the Council have learnt with much regret Mr. Ely's resignation of the office of Secretary, and desire to express their appreciation of the valuable services which he has rendered to the College whilst holding that office during the last ten years."

Advertisements having been published, announcing that the office of Secretary would become vacant, a very large number of applications for it were received, and after careful examination of the credentials of the several candidates, Mr. J. M. Horsburgh, M.A. (Oxon.), was selected and appointed by the Council to fill Mr. Ely's place.

PEEL MEMORIAL FUND.

The income of this Fund in 1886 was expended in the purchase of books, &c., presented to the Redditch Literary and Scientific Institute, the Social Evening Rooms, Ipswich, the Cobden Working Men's Club, London, and the West Hartlepool Literary and Mechanics' Institute.

LIBRARY CATALOGUE.

The preparation and printing of the Catalogue of the Medical and Biological works in the Libraries is completed, and the volume has been issued. The expenses of this have been defrayed, with the sanction of the late Mr. Samuel Sharpe, out of the donation of £1000 presented to the College by him to meet the cost of printing the Library Catalogue.

HOSPITAL.

The Committee of the Metropolitan Sunday Fund awarded to University College Hospital from their 1886 collection £1,558 6*s* 1*d*, and the Committee of the Hospital Saturday Fund £204 18*s* 8*d*. The People's Contribution Fund in aid of the Hospital has also contributed £500 to the charity during 1886.

In place of the usual dinner in aid of the Funds a Fancy Dress Ball and Fancy Bazaar were held in June and July respectively, which were most successful, and produced for the benefit of the charity the following amounts:—Ball £1,502, Bazaar £2,692. The Bazaar was held in the grounds of the College and was opened by H.R.H. Princess Louise, Marchioness of Lorne.

The Council has decided that it has become an imperative duty, not merely to enlarge but to rebuild the Hospital; and an appeal has accordingly been issued for contributions; but it is not intended to commence rebuilding until £30,000 have been received or promised. In the meanwhile the Treasurer and Secretary of the Hospital will be happy to receive donations either for this special object or for the general purposes of the Charity.

The attention of past and present Students is particularly called to the "Old Students' Jubilee Fund" as the most suitable channel for their contributions to the rebuilding Fund.

The late Dr. Wakley, Editor and part proprietor of the Lancet, and an old Student of the College, has munificently bequeathed to the College for and on behalf of the Hospital, his freehold residence Heathlands, Longcross, Chertsey, and 8 acres of land, for the purposes of a Convalescent Home for patients from this Hospital as a memorial of his late father, Thos. Wakley, Esq., M.P., and in commemoration of the establishment of the Journal called the 'Lancet;' the Home to be called the "Wakley Convalescent Home."

The Testator also bequeathed £1000 to be expended on the maintenance and support of the Convalescent Home at the rate of £200 per annum.

The Committee are earnestly appealing for help to pay off the existing debt, which exceeds £13,950.

The Right Hon. G. J. Goschen, M.P., has kindly consented to preside at a Dinner, which will take place in the spring, in aid of the Charity.

Return of Services of the Members of Council from February 1, 1886, to January 31, 1887, inclusive.
